Curing Compound

SPECIALTY CONSTRUCTION PRODUCTS

P R O D U C T D A T A

DESCRIPTION

Safe-Cure 1200 is a water-based, white pigmented wax emulsion curing compound for freshly placed concrete. When applied to new concrete, **Safe-Cure 1200** forms a film to retain water and promote the full hydration of cement to achieve maximum design strength and durability. Use of **Safe-Cure 1200** will minimize shrinkage cracks while reflecting sunlight to reduce surface temperatures during the curing process.

USES

- **Safe-Cure 1200** is used to cure exterior concrete including pavement, curbing, sidewalks, parking lots, median barriers and foundations.

ADVANTANGES

- Exceeds the moisture retention requirements of ASTM C309 and C1315
- Superior spraying characteristics, will not clog spray equipment
- White pigment reflects sunlight to reduce surface temperatures and helps gauge coverage and application rate
- Stable emulsion, will not hard pack in container
- DOT approved in many states

Application: Apply **Safe-Cure 1200** after all bleed water has dissipated and application will not mar surface. Apply uniformly leaving no pinholes or gaps. Do not allow material to puddle.

Mixing: Do not dilute. Stir or agitate **Safe-Cure 1200** before using to disperse pigments and solids uniformly. If using a pump, use an air diaphragm pump to circulate **Safe-Cure 1200**. Do not use a centrifugal pump. Mix only long enough to make the **Safe-Cure 1200** homogenous. Do not over mix as this may cause foaming and may damage the curing compound.

Spray Application: Always use a dedicated sprayer for water-based curing and sealing products. Use a low pressure airless sprayer equipped with a fan nozzle of 0.030 to 0.035" at 1 gpm. The optimum spray pattern is a 6 to 8" (15 to 20 cm) fan. Hold sprayer tip 6 to 8" (15 to 20 cm) from the concrete surface.

Roller Application: Use a short napped roller (3/8" or less).
