To Whom It May Concern:

EZ Strip Cure™ is a resin emulsified in water, single component, membrane-forming curing compound. **EZ Strip Cure** meets the requirements of ASTM C 309 Type 1, Class A.

The VOC content of this product is <50 g/L when calculated to California Air Resources Board Architectural Coatings Program. **EZ Strip Cure** will meet the requirements of the South Coast Air Management District requirements of less than 100 g/L VOC for concrete curing compounds. This could qualify for EQ credit 4.1 Low Emitting Materials: Adhesives & Sealants, or 4.2 Low Emitting Materials: Paints and Coatings, but not both.

There are no recycled materials used to manufacture **EZ Strip Cure**.

EZ Strip Cure is manufactured at 300 Edwards Street, Madison, OH. 44057. If your project falls within a 500-mile radius or $(\text{Distance by rail}/3) + (\text{Distance by inland waterway}/2) + (\text{Distance by sea}/15) + (\text{Distance by all other means}) \leq 500$ miles [800 kilometers] of this location; the product is considered a locally produced material and can help contribute to earning MR Credit 5.1: Regional Materials: 10% Extracted, Processed & Manufactured Regionally 1 Point, and MR Credit 5.2: Regional Materials: 20% Extracted, Processed & Manufactured Regionally 1 Point in addition to MR Credit 5.1.

ChemMasters products by virtue of being manufactured in United States are in compliance with the "Buy American Provision" set forth in the American recovery Reinvestment Act (ARRA) of 2009, section 1605
