

Nano First Aid for Concrete Finishing

FA-1™ Concrete Finishing Aid is a clear, colloidal silica finishing aid featuring nano technology to improve the finishing characteristics of freshly placed concrete. FA-1™ Concrete Finishing Aid features a state-of-the-art proprietary specialty polymer to provide greater lubricity to freshly placed concrete surfaces, allowing finishing tools to glide more easily and reducing the effort required to finish concrete.

 Makes concrete finishing easier, while improving both float and trowel finishing characteristics and surface appearance

 Extends working time, especially in hot, windy or low humidity conditions

 Reduces evaporation prior to and during finishing

 Preserves the integrity of decorative concrete color

 Hardens and densifies concrete surface — increases surface durability and strength
