

PERFECT FOR PAVERS

Seal. Stabilize. Enhance.

Seal. Stabilize. Enhance.

Traz™ 25 / Traz 25-A *Methyl-Methacrylate Sealer*

Developed for use as a high gloss sealer on pavers, decorative exposed aggregate, stamped concrete and terrazzo stone. Superior resistance to UV light, freeze/thaw, acid rain, staining and water absorption with moderate chemical resistance. Non-yellowing formula.

Polyseal™ WB *For Use With Pavers or Stone*

A water-based, non-yellowing stabilizer for sanded joints between pavers or stones. This state of the art proprietary formulation is designed to penetrate into and bind the joint sand and ensure the integrity of paver systems. Provides long-lasting erosion protection from heavy rains and winds while protecting pavers and stone from salt spray, acid rain, dirt, food and beverage spills, or fertilizer stains. Enhances the natural color of pavers or stone.

Paver Enhancer™ *Enhances & Enriches Architectural Pavers*

Paver Enhancer is a penetrating, water-based treatment that deepens and enhances the color of porous architectural dry cast pavers. This product was specifically designed for use on pavers for maximum cosmetic enhancement with uncompromised breathability. Paver Enhancer penetrates the surface of pavers, minimizing the formation of efflorescence and creating a matte finish that resists staining.
