

# Silencure™ SRT

*The Ultimate Driveway, Garage and Sidewalk Cure & Seal*

## One Product

curing compound and penetrating siloxane sealer all in one

## One Application

versus 3 steps over 30 days

## All Types of Concrete

for broom finished or hard troweled concrete

## Proven Long-Term Protection

penetrating siloxane sealer

## VOC Compliant

Solvent Replacement Technology is safe for indoor or outdoor use

# Silencure™ SRT

*The Ultimate Driveway, Garage and Sidewalk Cure & Seal*

ChemMasters' laboratory has produced a revolutionary advancement in concrete technology...the first penetrating cure & seal that is designed for use on broom-finished concrete, hand-troweled concrete and power-troweled concrete.

SILENCURE SRT is a patented, pure acrylic copolymer curing and sealing compound for new concrete installations or resealing existing concrete. When applied to newly placed concrete, SILENCURE SRT produces a non-yellowing, clear, continuous film, which effectively cures fresh concrete and provides a tough protective acrylic film to the surface.

SILENCURE SRT is unique. In addition to being an effective water-based film forming curing and sealing compound, it contains a proprietary blend of siloxanes which penetrate the capillary pores of the fresh concrete and form a silicone matrix which effectively prevents water and salt penetration of the concrete.

SILENCURE SRT also forms a deep penetrating siloxane sealer with a low gloss acrylic film former when applied to unsealed existing concrete.

- Unique SRT Advantage: **Solvent Replacement Technology** is environmentally safe, user-friendly, virtually trouble-free and easy to apply.
- Cures concrete to ASTM C-309 and ASTM C-1315 standards.
- Long-lasting protection from penetrating siloxane formulation.
- Exceeds NCHRP 244 standards for salt protection.
- Exceeds 100 freeze/thaw cycles without damage.
- Patented technology & formulation.

## ***Simplifies the Job, Saves Money on Labor & Time, Reduces Visits to Jobsite***

- No waiting — can be applied to fresh concrete
- Versatile — use on fresh or unsealed existing concrete
- No water curing — Silencure SRT is a film-forming cure
- No stripping or cleaning of curing compound in order to add a penetrating sealer
- One product works for all concrete finishes
- Compatible with all ChemMasters acrylic sealers to add a "wet-look" high gloss appearance

## **Our Knowledge is Concrete<sup>SM</sup>**

We manufacture a complete line of specialty products to improve, repair, protect and beautify concrete and masonry. Contractors rely on our experience, knowledge & quality to help ensure success.
